| G | General | The generated draft must contain the complete <b>42 pages exactly matching the Original Agreement</b> in: Sections · Clauses · Sub-clauses · Page sequence · Numbering format · Spacing & layout · Font size. | <i>Umbrella mandate for items 1–16.</i> | RESOLVED | — |
|---|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|----------|---|

## Approach

Switched the rendering pipeline from WeasyPrint+HTML/CSS to **docx + LibreOffice headless**. The 42-page master docx you provided is the source-of-truth template; LibreOffice renders it to PDF after token substitution. Word-compatible engine = near-pixel replica.

## What changed

- New services/docx\_pdf\_service.py — loads backend/masters/sca\_master\_v1.docx, substitutes {{F##}} / {{C##}} / {{A##}} tokens with agreement values, runs libreoffice --headless --convert-to pdf.
- New scripts/tokenize\_master\_docx.py — one-shot transform of your sample docx into a tokenized master, with cover-paragraph split + contextual (..... Insert.... ) substitution.
- Page size **US Letter** (matches source); body font **Tahoma** (installed via IELPKTH.CAB legacy MS bundle).

## Verification

**Scenario:** Render the demo agreement → pdfinfo reports **42 pages, 612×792 pts (Letter)**. pdffonts confirms Tahoma, Times New Roman, Arial, Georgia, Caladea embedded. Visual comparison page-by-page against the BGCC source confirms section breaks at the expected pages (Form §3 on p.4, DLP/LD block on p.7, TOC pp.9–11, etc.).

|       |         | The Admin shall have <b>editable access to modify, update, highlight, compare, and track all changes</b> . The dashboard shall maintain the original document structure and display contents page-by-page. |                               |        |           | <ul style="list-style-type: none"> <li>• <b>Document view</b> at /agreements/:id/document — left pane: full 42-page PDF; right pane: grouped field editor (F / C / A) + AppendixBuilder + ClauseRevisionsPanel.</li> <li>• <b>Admin</b> sees full edit surface (modify / update / save-and-regenerate / propose-revisions).</li> <li>• <b>Non-admin reviewers</b> (PD/Accounts/OM/GM) see a read-only field-values summary with an "Open Compare view →" button. No inputs, no buttons.</li> <li>• <b>Compare view</b> at /agreements/:id/compare handles the highlight / compare / track-changes (item 17-extension).</li> </ul> |

### Scenario

**Admin tweaks a wrong contract price after submission:** open Document view → Form fields section → change F08 → "Save & regenerate" → PDF iframe reloads in ~3s with the new value baked into every clause that references it (Form \$2, Appendix A07, Advance Payment \$3.4.1).

### ROUND-1 ITEMS (17–35) — REVIEW STATUS

|    |                  |                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                    |          |               |

| 17 | Admin Dashboards | 42-page SCA on left, Appendix on right in Workflow Review. Reviewers see both simultaneously without switching tabs. | <i><b>EXTENSION:</b> Introduce Side-by-Side Agreement Comparison (42 Pages). TRACKING WILL APPLY TO GM-PD-OM-ACCOUNTS-ADMIN. Two parallel columns: Original (left) / Revised (right). Each clause aligned page-by-page. All modifications clearly highlighted. Change tracking marks modified clauses / added or deleted provisions / financial or commercial adjustments / compliance or technical revisions.</i> | RESOLVED | Phase 4 v1+v2 |
|----|------------------|----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|---------------|

### Implementation

- New page /agreements/:id/compare — grid 4/4/4: ORIGINAL master / REVISED agreement / sidebar.
- ORIGINAL pane: GET /api/pdf/master/preview renders the master docx with empty tokens (the "Base Version – 42 Pages"). Cached server-side keyed by docx mtime.
- REVISED pane: GET /api/pdf/{id}/preview (accepted-only) by default, swaps to GET /api/pdf/{id}/preview/with\_changes when reviewer ticks "Show pending changes" — pending clause revisions render as Word track-changes (<w:ins> underline + <w:del> strikethrough).
- Sidebar: **ClauseRevisionsPanel** in "review" mode (accept/reject for non-creators) + flat list of every populated field value vs the empty master ("Original: — / Revised: value").

|       | Dashboards       | Box, Contact, Fax, Address) auto-filled in independent fields, NOT linked across fields.         |                                                                                                            |           |                               | <p>the master docx — the renderer doesn't touch it, so it's always present, in separate fields/runs, and never propagates between cells.</p> <h3>Status</h3> <p>Verified in frontend/src/pages/AgreementCreate.tsx Step 1: <b>Project Name, Site No, Project Location, Employer Name, Engineer/Consultant Name</b> are all manual text inputs with no auto-fill from any picker. Only the <b>Subcontractor</b> block has the picker (item 24) which auto-fills 7 sub-fields except contract price.</p> <h3>Why this matches BGCC's ask</h3> <p>Project / Employer / Consultant DETAILS = admin types them per agreement, no auto-fill picker. Sub-Contractor identity = picker-driven (item 24 explicitly says so). Bhatia first-party info = constant in the master docx (item 22).</p> <p>Subcontractor search picker on Step 1: typing a name shows a dropdown sourced from GET /api/subcontractors/?search=.... Selection pre-fills company_name / po_box / trade_licence_no / contact_person / email / phone / address. The Contract Price (F08) input is on the wizard Step 1 project block and is NEVER pre-populated from history.</p> <h3>What's in place already</h3> <p>Backend has services/email_service.py wired into the workflow — on every submit / return / approve / send-to-subcontractor, it tries to send an email via aiosmtplib and silently swallows transport failures. Currently logs and no-ops because SMTP env vars are not set on alpha.</p> <h3>Steps to enable</h3> <ol style="list-style-type: none"> <li>On the VPS: edit /var/www/sams/backend/.env and add SMTP_HOST=smtp.gmail.com (or your provider), SMTP_PORT=587, SMTP_USER=..., SMTP_PASSWORD=..., SMTP_FROM=noreply@bgcc.ae.</li> </ol> |

Bigger build, no SMTP dependency. Estimate ~3 days.</p>                                                                                    |
| 26    | Admin Dashboards | Two options: Bank Guarantee Cheque / Company Undated Security Cheque. Admin selects one to continue.             | <i>Step 1 → Completed in Step 3.</i>                  | COMPLETED | Round 1           | Field <b>C14 Performance Security Type</b> added to Conditions catalog via migration <code>002_user_feedback_round1.py</code> . Renders as a dropdown on Step 3 of the wizard with the two BGCC options. Selected value flows into the Conditions PDF clause 3.4.2 and the Appendix Performance Security row.                                                                               |
| 27    | Admin Dashboards | Thousands/Millions Separator: 1,000,000 (comma).                                                                 | <i>No new comment.</i>                                | COMPLETED | Round 1 + Phase 2 | Frontend: <code>formatNumber()</code> in <code>frontend/src/lib/formatNumber.ts</code> (Wizard preview, AppendixBuilder, AppendixView, Compare sidebar). Backend PDF: <code>_format_money()</code> in <code>docx_pdf_service.py</code> applied to <code>MONEY_FIELDS = {F08, C03, C11, A07, A09, A10, A20, A21}</code> .                                                                    |
| 28    | Admin Dashboards | Decimal Separator: 12.5 (dot).                                                                                   | <i>No new comment.</i>                                | COMPLETED | Round 1           | Same money helper preserves a dot as the decimal separator (en-US locale). 12.5 renders as 12 . 50 (with trailing 00) when formatted as currency, or verbatim as free text when not a numeric field.                                                                                                                                                                                        |
| 29    | Admin Dashboards | 'Back' button alongside 'Next' on the Agreement Creation Wizard.                                                 | <i>No new comment.</i>                                | COMPLETED | Round 1           | Back button shown on Steps 2, 3, 4 and 5 in <code>frontend/src/pages/AgreementCreate.tsx</code> . Step 1 has no Back since there's no previous step.                                                                                                                                                                                                                                        |
| 30    | Admin Dashboards | In the Agreement Creation Wizard, <b>Step 2: Sub-Contractor Company Name is displayed again? Please clarify.</b> | <i>Status flagged (yellow — needs clarification).</i> | CLARIFY   | Phase 1 partial   | <p><b>Status</b></p> <p>Round 1 (2026-05-11) dropped F02–F08 from Step 2 via the <code>STEP1_DUPLICATE_F_FIELDS</code> filter — the Subcontractor company name is no longer rendered as an input on Step 2. Phase 1 (2026-05-16) additionally rewrote Step 2's heading + description to remove the word "Subcontractor", which appears to have been the source of the visual confusion.</p> |

## What's on Step 2 now

Summary

- **Resolved this round (Rev 01):** items 1, 2, 3, 4–16 (umbrella), 17, 23, 30 (pending re-test), 33, 35 — **11 items.**
- **Completed in round 1 (still good):** items 18, 19, 20, 21, 22, 24, 26, 27, 28, 29, 31, 32, 34 — **13 items.**
- **Deferred:** 25 (notifications — needs SMTP creds).
- **Reference only:** 36–41 (wizard screenshots).

Branch state on feat/rev01-pdf-fidelity

- a370953 fix: lock /document for non-admin; clear leftover Insert markers
- dc1e0ec feat(document): open /document to reviewers in read-only mode
- 67e5d22 fix(rbac): relax read-only GETs to any-auth so reviewers can open Compare
- 1982c82 feat(compare): open Compare view to GM-PD-OM-Accounts-Admin
- 1b922e2 fix(pdf): order /pdf/master/preview before /pdf/{agreement\_id}/preview
- 8591fdc feat(revisions): accept/reject workflow + RBAC + audit (Phase 4 v2.1)
- d43bfd8 feat(revisions): inline track-changes in PDF (Phase 4 v2.2)
- 0f6f197 feat(revisions): per-agreement clause revisions (Phase 4 v2.0)
- 3c2e09b feat(compare): side-by-side Compare view (Phase 4 v1)
- 1d566eb feat(document): side-by-side Document view with inline PDF + field editor
- a8e6c6d feat(pdf): apply currency formatting to numeric tokens in docx render
- cc12b44 fix(pdf): body font is Tahoma (per docx styles.xml), not TNR
- 14155f6 fix(pdf): give LibreOffice a writable per-render profile dir
- 219e912 feat(pdf): exact 42-page replica via tokenized BGCC docx
- 38d1a27 feat(pdf): switch render pipeline to docx + LibreOffice for true replica
- 2dd5a3b feat(pdf): match 42-page BGCC source layout (TOC, Annexures, fonts)

- 96dd4e0 chore(pdf): switch templates from A4 to US Letter
- c1e287d chore(ops): add idempotent VPS font install script
- 52f3923 feat(agreements): reference format SAG-{YEAR}-{SITE\_NO}-{REF\_NO}
- 861b2b9 feat(ui+pdf): render dates as "05th May 2026"
- 43359be fix(wizard): clarify Step 2 heading
- 702febc feat(appendix): A-fields always re-derive; explicit Edit locks the row
- 1fa6134 docs(masters): expand help panel with A-to-Z guide
